# The Arkansas Certification Strawberry Program

## **BLUE TAG**

Certified Blue Tag Strawberry Plants are produced by a limited number of commercial growers who can meet the requirements for the grade. The planting stock must be certified Purple Tag stock grown by the University of Arkansas. Plants must be located so that at least one mile separates them from any other strawberry planting. Ground must not have been used to grow strawberries within the past 10 years. Ground must be at least one mile from any area known to be infested with Red Stele Pathogen.

## **GREEN TAG**

Certified Green Tag Strawberry Plants are produced from certified Blue Tag plantings. All Certified plantings are required to pass a rigid inspection by the plant board.

Arkansas Certified Strawberry Plants are virus free, disease free, and free from Red Stele, Root Knot Nematode.

## **BLAKEMORE**

One of the very early varieties that can be depended upon to produce crop every year. Berries are light, bright red. Firmness of berries and the bright color of frozen and preserved products makes Blakemore a favorite commercial variety.
